

PhD in RNA Biology

at Charles University, Prague, Czech Republic.

Two PhD positions in RNA Biology are available within the STARS program at the Faculty of Science, Charles University, Prague. Students will be part of the fully EU-funded and well-equipped research team in the Laboratory of RNA Biochemistry, located in the city center, close to the University Botanical Garden.

For more information about the STARS program, open positions in RNA Biology and to apply, please follow the links to the research topics "Translation regulation in mitosis 2.0" and "Non-canonical mRNA cap-binding translation initiation factors in cancer and development" below and/or using the QR code:
