Job offer: Research Assistant in Molecular Cancer Biology (Short Term)

There is an opportunity for a junior Laboratory Technician / Research Assistant to work under the supervision of Dr Roberta Esposito at the Department for Biomedical Research (DBMR).

The candidate will be responsible for carrying out experimental research relating to a project that identified novel non-coding RNA genes driving tumorigenesis. She/he will perform a range of molecular and cellular techniques, including but not limited to qRT-PCR, human cell line culture, transfection, phenotypic assays (cell growth and death). She/he will be expected to be diligent, organised and self-motivated.

More information on the project may be found here:
https://www.biorxiv.org/content/10.1101/2021.11.06.467555v3

The position will initially be for 6 months, with the possibility of extension. Salary will follow the scales of the University of Bern. Full training and support will be provided.

This is an excellent opportunity for a recent MSc graduate wishing to extend their experience, or for a more experienced candidate looking for short-term opportunity. This is also an opportunity for a young researcher wishing to enter the non-coding RNA / cancer genomics fields.

Relevant experience in molecular and cellular techniques will be advantageous.

Interested? Please send your CV with a brief email to Roberta Esposito (roberta.esposito@dbmr.unibe.ch) with subject line “Research Assistant Offer 2022”. Informal enquiries are also welcome.
